about the DATA CENTER

The center is 3,300 square feet, with 2,000 square feet dedicated to IT processing and data storage infrastructure.

Faster Networking Speeds

A high-capacity 10 GB fiber network provides faster networking speeds.

24/7 Security

The center has a modern security framework and is equipped with 24/7 automated video surveillance, armed response, and a two-factor entry control system.

Data Capacity

The center has the capacity to store and process approximately 500 TB of data. The center has 24 servers with 12 TB of memory and 2.4 THz of computing capacity.

The Latest Technology

Hosting more than 700 virtual servers, the center is equipped with the latest technology ready to process and store data from various sources.

Environmental Control System

The center features state-of-the-art environmental controls, including fire suppression, redundant power, and environmental conditioning.

Backup Site

NSPARC maintains a fully capable backup site in Jackson, MS, to ensure continuity of operations.
